

Air Handlers

FHRNTT

Fujitsu air handlers are engineered to be energy efficient and quiet - providing you with a higher level of comfort. The robust design also helps to keep your utility bills low while delivering conditioned air for your space.

Reduce Energy Bills

The air handler is designed to exceed minimum efficiency standards and delivers savings every time it is in use. The high efficiency blower motor ensures the right amount of cooling or heating is distributed throughout your home.

Benefit – Packed Operation

Our Air Handler is convertible for various system requirements, and the compact design and sound control elements help ensure that it operates efficiently and quietly.

Quality Construction

Heavy gauge pre-painted steel that is hemmed and folded to eliminate sharp edges embodies the quality of this air handler. The all aluminum evaporator coil ensures many years of worry-free operation. And, the gasketed access panels ensure less air leaks out of the unit and distributes through your home's duct system instead.

Enjoy the Benefits of a Higher Level of Comfort

Fujitsu air handlers are engineered to improve comfort all year long. The unit's versatile design makes it a great fit for any system and keeps your home conditioned just the way you like it.

Humidity Control

A new Fujitsu Handler will help manage humidity levels in the home, improving your comfort and helping you save money on energy bills.

Efficient Heating & Cooling

Fujitsu Air Handlers feature a flexible design that allows them to meet the needs of a variety of systems. Your Contractor will recommend a unit that will best meet your home's airflow needs. The ❶ **factory-installed indoor aluminum cooling coil** is the key component for your air handler. The coil is essential to humidity control and improved system performance, and the high-quality standards used in manufacturing result in fewer maintenance calls.

Quiet Operation

The Fujitsu Air Handler is designed with a ❷ **sturdy steel cabinet** with ❸ **one inch of foil-faced insulation**, offering excellent thermal and sound insulation.

Versatile Design

The 4-way convertible design of Fujitsu Air Handlers allows the unit to fit in with the design of your home.

Quality Design

The Air Handler features a lanced fin all-aluminum coil design for maximum performance and increased efficiency. A new high-grade condensate drain pan keeps the unit operating smoothly, especially when the weather heats up. The integrated control board closely monitors system operation while providing safety lockout features should an issue arise. Your contractor can diagnose any problems quickly thanks to optional EcoNet capabilities and Bluetooth technology that provides for fast and easy installation, maintenance, optimization, and monitoring of your equipment. And the corrosion-resistant aluminum endplates keep your unit looking as good as it runs.

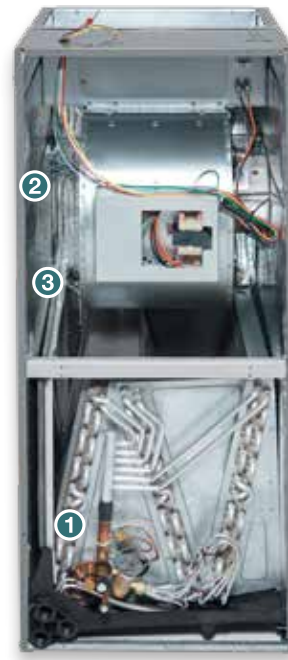

Limited Warranty Information:*

Conditional Parts - 10 Years (Registration Required)

* 1 For complete details of the limited warranties, including applicable terms and conditions, contact your local contractor or go to www.fujitsugeneral.com for a copy of the product warranty certificate.

2 Proper sizing and installation of equipment is critical to achieve optimal performance.

BENEFITS AT-A-GLANCE

MOTOR:

Constant torque 1-stage airflow with Thermal Expansion Valve (TXV)

EVAPORATOR COIL:

All Aluminum

WARRANTY*:

Conditional parts - 10 years
