

Gas Furnaces

FF80ST

EFFICIENCY:
80% AFUE

Fujitsu gas furnaces have all the right features to create a comfortable environment for you and your family. Our furnaces are also quiet, so you can stay focused on what matters most while in your home.

Quality and Reliability

We're serious about the quality and reliability of our gas furnaces. Our rugged, industrial design starts with heavy gauge pre-painted sheet metal that is folded and hemmed to minimize sharp edges and provides superior strength. The heart of the furnace is the proven tubular aluminized steel heat exchanger that provides exceptional heat output controlled by an integrated furnace control that closely monitors system operation while providing safety lockout features should an issue arise. Your contractor can diagnose any problems quickly thanks to a 7-segment LED readout on the control. Fujitsu furnaces also utilize a direct-spark ignition system that is up to nine times more reliable than alternative ignition technologies. The result is a quality heating product that gives you peace of mind.

Peace of Mind

In addition to many features to ensure years of reliability, our gas furnaces are also backed by a 10 year conditional parts and a 20 year heat exchanger warranty.

We Did the Work So You Can Stay Comfortable

Our gas furnace is designed to provide your home with reliable, quiet comfort for years to come.

Reliability is essential to your home comfort

That's why we've built our gas furnace with the Direct Spark Ignition System – it's nine times more reliable than most hot surface igniters. It's also the same proven design used in commercial HVAC equipment and other commercial gas appliances such as industrial clothes dryers. The heat exchanger is easy to maintain and can be cleaned, when needed, by your local Fujitsu dealer. A clean furnace is a long running furnace.

Quiet Operation

is the result of fully-gasketed independent access doors with a quarter-turn knob system that provides tighter door seals to eliminate air noise. Our furnaces also utilize advanced blower motor technology for exceptional airflow delivery without excessive sound output.

We've also added rubber grommets on the motor mounts in the blower shelf to minimize unwanted noise. Finally, our in-shot burner system delivers tempered air to the heat exchanger with minimal effort. The result is an impressively quiet furnace.

Fast and Accurate Diagnostics

are a big benefit to both you and your dealer. Our gas furnace features diagnostics with a 7-segment alphanumeric LED display that simplifies troubleshooting. Just in case there's a need, service calls are faster, which ultimately saves you money.

Save on Your Energy Bill

with a new gas furnace from Fujitsu. This model delivers 80% AFUE, which means 80% of the fuel in your furnace is converted to heat for more efficient comfort and savings for your home.

Hassle Free Installation

saves you and your dealer time and trouble. The 34" cabinet fits nicely in tight spaces allowing for both new construction and retrofit installations

BENEFITS AT-A-GLANCE

EFFICIENCY:
80% AFUE

GAS VALVE:
1-STAGE

BLOWER MOTOR:
Constant torque fixed speed

WARRANTY*:
Conditional parts – 10 years
Heat Exchanger – 20 years

NOTE:
-Standard LoNOx models
available

LIMITED WARRANTY INFORMATION:*

Conditional Parts - 10 Years (Registration Required)
Heat Exchanger - 20 Years

* 1 Annual Fuel Utilization Efficiency (AFUE) measures the amount of heat delivered to a home compared to the amount of fuel that is supplied to the unit. Higher AFUE ratings reflect higher efficiency

2 For complete details of the limited warranties, including applicable terms and conditions, contact your local contractor or go to www.fujitsugeneral.com for a copy of the product warranty certificate

3 Proper sizing and installation of equipment is critical to achieve optimal performance.
